

Project Plan

This document provides a detailed explanation based on the selected project title and its academic importance.

Project Overview

The project plan includes ideation, requirements, design, implementation, testing, and documentation. The timeline was structured to help complete the work in a systematic manner.

Technical Explanation

This approach makes the development process organized and easier to present. It also ensures that each stage contributes to the final professional submission.

Submission Value

This document demonstrates careful planning, which is essential for a strong SmartBridge project. It shows that the work was not done casually and was managed with purpose.

Project Plan - Continued

The second page expands the explanation with implementation details and project relevance.

Implementation Summary

The solution is modern, responsive, and suitable for SmartBridge submission.

It covers dashboard monitoring, prediction, reporting, and alert review in a simple workflow.

The project combines Flask, SQLite, Bootstrap, Chart.js, and Python machine learning tools.

The final deliverable is professional, documented, and ready for academic evaluation.
